E-SMS Send

Instantly send messages to your entire sales team.
 Distribute marketing messages to your clients.
 Remind staff of important meetings.
 Advise clients of contract renewal dates.
 Advertise new product launches.

E-SMS Merge

Personalises a group SMS by adding each person's name at the beginning of your message.

E-SMS Receive

By default receive your replies back to your mobile.
 With an E-SMS Virtual Number you have the choice. Mobile or desktop.
 A reply can come back to your desktop (any of the 100 users that sent the message); back to your mobile or just sends the message out with your business name not allowing a reply.

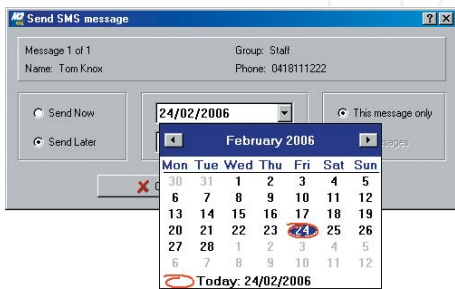

E-SMS Safe, Secure & Reliable

The reliability of the service ensures the end user gets the information you want, in a safe and accurate manner.

If you have field staff, be they sales, technical or delivery, in today's environment where answering a mobile in a vehicle is both unsafe and often illegal, E-SMS allows for the message to be delivered accurately and retrievable when it is safe to do so.

E-SMS Instructions

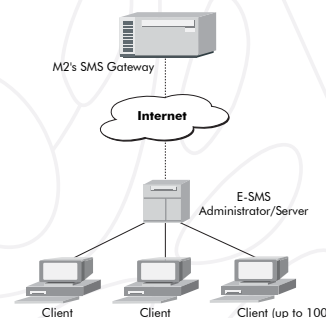

Simply install the self extracting software, securely purchase your SMS credits online and start doing business with E-SMS – SMS for business.

E-SMS Scheduler

Lets you create scheduled and delayed messages (great for automatic birthday greetings or regular team meeting reminders).

So how does it work?
